Measures for the prevention of Cholera in South Travancore.

66. MR. K. MADHAVAN PILLAI (*Trivandrum* cum *Neduvangad*): Will the Government be pleased to state the number of times the Sanitary Commissioner visited the taluks in South Travancore after the subsidence of the recent cholera epidemic and the nature of his recommendations, if any, for preventing recurrence of the epidemic?

MR. P. N. KRISHNA PILLAI (*Secretary to Government*): It is reported that the Sanitary Commissioner visited some of the taluks once and others twice, but not all the cholera affected taluks in South Travancore. The Commissioner has submitted proposals to Government for the removal of sanitary defects in the sea coast villages, by the opening of major and minor conservancy stations in the affected areas, for the provision of protected drinking water, removal of congestion, the promulgation of a sanitary law and the education of the masses on matters relating to hygiene and public health and for the deputation of a Medical Officer with experience in cholera work for the investigation of the epidemiology of cholera in South Travancore. In pursuance of his recommendations, the Government have already directed Dr. M. K. Gopala Pillai to study the epidemiology of cholera in Travancore and to prepare and submit to Government a detailed report on the subject. Provision has also been made in the Preliminary Budget for 1105, on his recommendation, for the opening of five more conservancy stations and for the sinking of about a dozen tube wells in the sea coast-villages and at other convenient centres.

MR. K. MADHAVAN PILLAI (*Trivandrum* cum *Neduvangad*): What has the Government done on the recommendation of the Sanitary Commissioner regarding the necessity for educating the masses on matters touching hygiene and public health?

MR. P. N. KRISHNA PILLAI (*Secretary to Government*): Government are waiting for the organisation of a Public Health Department which is now under consideration.
